

PROSPECTUS

OF

THE AMERICAN JOURNAL OF FORESTRY

EDITED BY

FRANKLIN B. HOUGH, PH. D.,

Chief of Forestry Division, Department of Agriculture, Washington, D. C. Author of "Elements of Forestry," etc.

If sufficient patronage is secured to warrant the publication, the undersigned will undertake to issue a Monthly Journal of the above title, commencing on the first of July next, and to be continued regularly on the first day of every succeeding month.

Each number will contain forty-eight pages, which, with a full index, will make a volume of about 600 pages a year.

Dr. Hough has the assurance of coöperation from persons who have taken an active part in investigations upon forestry in the United States and Canada.

A diligent effort will be made to render this journal worthy of the confidence and support of those who are interested in the question of Forestry, in its various relations, and the medium of popularizing and diffusing the latest and best results of study and observation upon this important subject. It will be open to the discussions of questions relating to planting for profit or ornament,—and to the various matters that come within the province of scientific research, or practical application, within the broad field of inquiry presented in the general subject of Forestry,—including as well the planting and management of woodlands, as the economies that relate to their various products.

No articles will be admitted that are intended to promote some private interest, and none that do not tend to the advancement of knowledge by the discussion of principles, or the diffusion of valuable information upon subjects within the sphere of its inquiry.

The price of the Journal will be *Three Dollars* a year.

Subscribers will please send their names and addresses to

ROBERT CLARKE & CO., Publishers,

CINCINNATI.

APRIL 26, 1882.
